## **LANGUAGES**

Amharic || English

## **PROJECTS**

### **Bus Ticket Booking System|| Online Ticket booking system**

- The project was implemented for my last portfolio project in my ALX one year program. I used the python framework Flask for the backend.

### **Electronic Tender Processing and Garant System**

- JavaScript's React frontend framework was used to develop the front of the E-tender application and Python's Django framework was used to develop the backend of the E-tender web API.

### **RFID Based Secure Gate Controller**

- The main objective of this project was to design and implement RFID based secure gate controllers that can be used in highly protected areas such as homes, industries, companies, hotels and universities. It was implemented using the python programming language and we used hardware materials.
